

CLAIMS: I claim:

Claims 1 –12 (canceled)

- 1 (new): A mail delivery indicator system designed for a mailbox having side portions, and a front door pivotally mounted thereon, comprising:
  - a) an elongated delivery indicator flagstaff with a flagged end and a weighted end;
  - b) said elongated delivery indicator flagstaff being pivotally attached to a side wall mounting bracket means;
  - c) said weighted end comprises an indicator flag stand element and an weight element;
  - d) said weight element being pivotally attached to said indicator flag stand element of said elongated delivery indicator flagstaff; and
  - e) a pivotal point for said weight element being positioned above the center of gravity thereof to display always a correct, upright posture of said weight element.
- 2 (new): The mail delivery indicator system of claim 1 wherein the traversing motion of said elongated delivery indicator flagstaff to a generally vertical signaling position is controlled by the location of said pivotal point of said weight element on said indicator flag stand element.
- 3 (new): The mail delivery indicator system of claim 1 wherein the plurality of adjustment holes are provided on said indicator flag stand element below the pivotal bolt hole thereof when said elongated delivery indicator flagstaff is in a generally vertical signaling position to receive a pivotal pin to attach said weight element to said indicator stand element.
- 4 (new): The mail delivery indicator system of claim 1 wherein an adjustment aperture is provided on said indicator flag stand element below the pivotal bolt hole thereof when said elongated delivery indicator flagstaff is in a generally vertical signaling position to receive a pivotal pin to attach said weight element to said indicator stand element.
